

Winona & Winona County Comparison, 2019

It is important to review the retail performance for the whole county and not just the city in isolation. For example, it is common for county seat towns to have above-average retail performance, while the county overall has a leakage of sales. This is usually because the county seat city doesn't have the critical mass of retail to attract the purchases of everyone in the county. By analyzing county data, city business people can develop strategies to recapture some of the sales being lost to other cities. For counties that have a local option sales tax, the analysis of county sales is extremely important, since lost sales are lost tax dollars. A thorough analysis of county sales can help county officials develop more meaningful economic development plans aimed at recapturing the lost sales.

The table below shows retail sales and number of firms by merchandise category for Winona and Winona County in 2019. Winona accounted for 57 percent of the county's firms and 88 percent of the county's sales.
