## Commuting Patterns

Proximity to employment is often a primary consideration when choosing where to live, since transportation costs often account for a large proportion of households' budgets. Table E-5 highlights the commuting patterns of workers in the PMA in 2014 (the most recent data available), based on Employer-Household Dynamics data from the U.S. Census Bureau.

The left-hand side of the table shows where workers that are employed in the PMA live. The right side of the table shows where Winona PMA residents are employed. The PMA includes the Cities of Winona, Goodview, Minnesota city, Stockton and Rollingstone and the Townships of Hillsdale, Rollingstone, Homer, Wilson and Warren.
